A ROYAL NORTHWEST MOUNTED POLICE STATION.

Glimpses of everyday life at a mounted police post in Canadian Northwest.

In view of the changes which have taken place in the R.N.W.M.P., the above photographs should prove of great interest.

A DIFFICULT STUNT FOR A HORSE.

HOW FOUR AND A QUARTER MILLION WILL BE SPENT

Out of \$4,246,725 City Council Has Voice In Spending Only \$1,738,108

The Contingency Fund Will Provide For the Necessary Salary Increases

City of Hamilton estimates for the year 1920 based on a rate of 32 mills on the dollar were completed on Saturday by City Treasurer Leckie on Saturday, the results of which were published in detail in the Times that day showing a total of all receipts for the year of \$4,246,725. With this amount, raised by 32.5 mills on an assessment of \$30,098,210, the Board of Control has provided for the payment of unestimated expenses amounting to \$2,508,437, or 60 per cent of the whole expenditure of the year. The other 40 per cent of \$1,738,108 is set aside for expenditures in which the council has any say. The 32.5 mills will provide enough to meet all the expenses of the other 60 per cent of the year, while out half of the remaining half of the year, draft of 1918, amounting to \$73,364, leaves a balance of \$1,634,744, and a contingency fund of \$92,250. This latter, the contingency fund, is already appropriated for the payment of all the salary increases of the year—of course not including teachers' and policemen's salaries, which are separately treated and fixed by independent boards within which the city council has jurisdiction, and which increase will be voted on January 1.

The estimated expenditure for the year is as follows:

Hall Overhead	\$ 75,864
General Defense Interest and Sinking Fund	182,427
Local Defense Interest	1,311
Separate Schools	3,811
Borrowed Capital	343,651
Public Library	45,000

inconveniences. It means protection to the fall wheat, and a good crop of this precious grain for the coming autumn.

EMBARGO ON

Pennsylvania Road Cannot Move Freight.

Bridgeport, Feb. 22.—The Pennsylvania Railroad has put into effect a new, complete road restriction, or temporary embargo. This is not due to desire to discriminate against that territory, but is to prevent the condition of the Pennsylvania lines in the United States is such that it will be impossible to move freight over the roads.

Superintendent Wittenberger, Super-

intendent C. Cronkite, of the Pennsyl-

vania Central, and other officials have been at the frontiers the past several days endeavoring to speed up freight.

D. F. MONTIZAMBERT.

GROCERY PROBE

Local Men Think It Will Be Good Thing.

On March 8th, at 11 o'clock in the morning, the investigation into the allegations laid against Hamilton retail grocers, will begin in the city court room, under the direction of the attorney-general. The charge is that the retail grocers have been guilty of fixing prices on certain commodities.

"In spite of these facts, British business and finance are recovering. Businesses men and workers are recovering from the effects of the war. Their customary energy is reviving, and they are getting back to work and output. According to estimates made public by one bank chairman, the profits of experts will probably be a profit of from 10 to 15 per cent."

"We are round the corner," said Mr. Ballie, of the grocery firm of Ballie Brothers, Locke and Main streets, is quoted as saying.

Mr. Ballie stated to The Times this morning that the grocers are definitely agreed to fix prices where the blame really rests. Whether the investigators will go farther than this, he did not say.

"I do not know, but they will be given ample proof that there are others who have been guilty of fixing prices in the interest of justice, the commission will not be satisfied to let the case rest without having a good order of justice done to the interests of the public,"

"The fourth of Great Britain's debt is to the United States. It is neither an easy nor engaging task to try to collect the debts of the United States,"

"We are round the corner," said Mr. Ballie.

"We will consider our debt to the United States," was the reply in which Mr. Ballie accepted the coming probe.

Stone Bed Warmers

To keep the bed warm on cold nights a stone pig is the best to use. When filled with hot water they will stay warm for hours.

Just the thing for people who suffer from cold feet, aged people, invalids, etc. in different styles in various sizes at Parkes and Parkes, Limited, Market Square.

BRITAIN SOUND FINANCIALLY COMMERCIALLY

American Chamber of Commerce of London Sets City Still World Leader.

NOT FOR SELF

Is Britain's Appeal, but for Europe—Big Year's Trade.

(A. P. Special Cable)

London, Feb. 23.—Great Britain's fundamentally sound, both financially and commercially, say the American Chamber of Commerce, London, in a statement referring to the financial position of Great Britain and the continental European countries. "The Chamber of Commerce of London believes that the unprecedented drop in the exchange on the United States makes it particularly important that the American opinion on each side of the Atlantic concerning this question should be unanimous on the other side."

After a thorough discussion with the leaders of British finance, it is felt largely by the address of the chairman of the chamber, Mr. George L. Griffiths, that the banks to their stockholders in annual meeting, the Chamber of Commerce of London, has given a strong American business public. The message reads as follows:

"The coming of the pound sterling in New York is no index to Great Britain's financial strength or weakness. London is to-day, as before the war, the strongest financial center in the world. With inadequate assistance from American credit in Europe, Great Britain is able to supply its own credit needs of the continent, as well as those of her own traders."

The message reads as follows:

"In view of the present situation in Great Britain, not New York—London exchange Great Britain is neither better nor worse, but larger than ever before in her history. This debt was incurred mainly to supply the needs of the war, and she is owed approximately twice as much as she is owned abroad. While Great Britain is not far behind in collecting all her British debts, Great Britain is preparing to fight off foreign creditors."

"In spite of these facts, British business and finance are recovering. Businesses men and workers are recovering from the effects of the war. Their customary energy is reviving, and they are getting back to work and output. According to estimates made public by one bank chairman, the profits of experts will probably be a profit of from 10 to 15 per cent."

"We are round the corner," said Mr. Ballie, of the grocery firm of Ballie Brothers, Locke and Main streets, is quoted as saying.

Mr. Ballie stated to The Times this morning that the grocers are definitely agreed to fix prices where the blame really rests. Whether the investigators will go farther than this, he did not say.

"I do not know, but they will be given ample proof that there are others who have been guilty of fixing prices in the interest of justice, the commission will not be satisfied to let the case rest without having a good order of justice done to the interests of the public,"

"The fourth of Great Britain's debt is to the United States. It is neither an easy nor engaging task to try to collect the debts of the United States,"

"We are round the corner," said Mr. Ballie.

"We will consider our debt to the United States," was the reply in which Mr. Ballie accepted the coming probe.

NOT ASKED TO AID VET.

"Appeals for American credit in behalf of the destitute areas of Europe have been made, with the result that appeals for assistance to Great Britain. Such emphatically is not the case. British bankers are loaned to Americans bankers and American bankers are loaned to British bankers only for such friendly relations as they have enjoyed and had during the war, and not for political or financial reasons."

"Mr. Ballie stated to The Times this morning that the grocers are definitely agreed to fix prices where the blame really rests. Whether the investigators will go farther than this, he did not say.

"I do not know, but they will be given ample proof that there are others who have been guilty of fixing prices in the interest of justice, the commission will not be satisfied to let the case rest without having a good order of justice done to the interests of the public,"

FOR SALE

FOR SALE—CLERKSHIP TWO BUSES.

Two buses, black Siberian Hares;

pedigreed, old reliable

motor cars, etc. Call

King Street, Dundas, or Times, Hamilton.

Price, \$1,000.

John Brown, at Jolley's Garage, corner

Main and Catherine streets.

PLAYPIE, PIANO, NEARLY NEW.

With stand. \$100. Call 15 May-

ster street opposite Lyre.

I BUY LARGE AND SMALL BASE-

MENT, ETC.—P. G. Garfield 620 Avon-

dale Ave.

OR SALE—GROCERY STORE WITH

stock, with large brick dwel-

ling, 100 ft. from street.

Price, \$1,500. Apply W. P. Elliott,

Parkdale.

FOR SALE—CHEAP: FIVE PASSENGER
CARS.

Second-hand, half price.

Call 15 Main Street.

FARMERS STOCKHOLDING ATTENTION:

Second-hand, half price.

Call 15 Main Street.

KINLOCH, WOOD, SAWDUST FOR

building houses. One quarter the

price of stone.

James MacKinnon, 15 James

Street, Stratford.

PUBLISHED BY
THE TIMES PRINTING CO.,

LIMITED.

Corporation King William and Hughes Sts.
Business Telephone 355.
Established 1872, now in its 48th year.
Founded 1872 and published continuously
since 1872 under the name of "The Times".
Containing advertising space and
space required.Representatives in all the principal cities of
the Dominion by Local Advertising
Agencies.

MONDAY, FEB. 23, 1920.

AN INQUEST NEEDED

Nothing but "commiseration and deep regret can be felt over the sad tragedy on Saturday night that robbed three human beings of their lives in the most dreadful manner one can imagine, and bereaved a husband and wife of their beloved son. There are no words of comfort, but only the ones left behind in his sorrow will have the sympathy of the whole community. How the fire occurred is somewhat of a mystery; the fire knew of it coming from the husband when he was aroused by a siren noise. When he reached the room it found the wife and daughter asleep and in his effort to rouse all fell down stairs and injured himself. It is not exactly known how the premises took fire. It is thought that there might have been some defect in the building. Whatever it was that caused the tragedy was necessary, that we should import so much from the United States. Do we really know what we are doing? We never article that we buy over there we have to pay an extra 12 cents or more on the dollar.

NORTHERN MANITOBA

The Manitoba Government has published an interesting pamphlet on "Mining and Mineral Prospects in Northern Manitoba" by Mr. R. C. Pritchard. The pamphlet is brief but gives a short description of the mineral deposits in so far as they have been discovered and developed, in the territory which was added to the Province of Manitoba in the year 1912. Although two hundred routes of communication have been opened—the Hayes River route from York Factory to Norway House; and the Saskatchewan River route from Grand Rapids to Cumberland House, the latter part situated in the Saskatchewan side of the divide, the work has been comparatively little travel with the object of discovering mineral wealth apart from the main waterways. The pamphlet says:

"The Hon. Mr. Raner was elected by acclamation in East Wellington to-day. Col. Pritchard having refused to run at the last moment. The Drury Government is now complete, all the Ministers having secured seats.

Should the city insure itself? That is a question that is up once more. The City Hall is valued at \$150,000. The city pays altogether in insurance upon its various properties less than \$6,000. Suppose the City Hall was burned down, how much premium would it take to make the loss good?"

The Forward Movement is now about over. The result is such that all the churches concerned have shown that their hearts were in the movement. This is not such a bad world after all. The Bible has not yet lost its influence, and religious teaching is a potent force in the country.

Judging by the figures given in the monthly report of the Ontario Board of Health, there is still a city for a clinic to deal with hidden diseases. There is a lot of unsuspected venereal disease in the city, while a menace to the people's health continues in various ways and often the innocent are sent on account of the guilty.

The little children come first. Our charitable institutions for their care should not have to complain for want of support. It may be that when mothers' pensions are in existence and when other social reforms are made, the public interest in this institution will be largely surrendered.

In the meantime the city cannot shirk its duty in connection with their main tenance.

The fifth clause bears up again. It is stated that the Liberal League proposes that a bill be introduced into Parliament making a three-fifths majority necessary before the Provinces can take advantage of the Dominion Act permitting them to have a vote on the question of prohibiting the importation of intoxicating liquors. This is a vote which Parliament would not likely give, and the Government would not be able to get it.

We think that the Government will make a serious mistake if it attempts to carry on beyond the present session. Perhaps, the result of the coming elections will impress that upon its mind. The Liberal Unionists members must be brought back to their constituents seeking re-election as Liberal-Unionists; they would forever declare themselves outside the pale of the Liberal party, and, at the same time, very likely court defeat and political oblivion.

The war Parliament is a thing of the past. There is no question to come before the House that cannot be settled by a peace Parliament, representing all the people elected by the votes of the nation.

The war Parliament is not a representative one. It does not represent half the people. It has no excuse for further existence and the Government has no claim on the people. It is a case of hanging on for the sake of keeping in office.

OPENING OF PARLIAMENT

Workers are busy writing to their members in Parliament in preparation for the opening of the Dominion Parliament on Thursday next. Very little has been given out by the Government as to the legislation to be introduced during the session. The workers are hoping to have a say in the control without much of an idea as to what is expected of them. It is believed that, although Sir Robert Borden may be the country by that time, he will not be present at the opening. In fact, it is not known whether he will be present on the date of the opening of the Parliament. Sir George E. Foster will be the Acting Premier, with perhaps Mr. McNeish or Mr. Howell as leader of the house.

The two prime ministers, to come before the House, will be the tariff and a new election act. Or it may be that the Government, if it is determined to hang on for another session, may introduce the introducing of an election act, leaving it to the next session. The Government can not afford to pass an election act necessary before another election can be held. The Liberals are ready and eager for an election, and no doubt Mr. King will press for one. As to the tariff the Government has no policy to play with, and has no policy of its own either than to let the tariff alone as far as possible. But the demand from the Northwest will be more intense than ever, and something will have to be done to appease the farmers.

We think that the Government will make a serious mistake if it attempts to carry on beyond the present session. Perhaps, the result of the coming elections will impress that upon its mind. The Liberal Unionists members must be brought back to their constituents seeking re-election as Liberal-Unionists; they would forever declare themselves outside the pale of the Liberal party, and, at the same time, very likely court defeat and political oblivion.

The war Parliament is a thing of the past. There is no question to come before the House that cannot be settled by a peace Parliament, representing all the people elected by the votes of the nation.

The war Parliament is not a representative one. It does not represent half the people. It has no excuse for further existence and the Government has no claim on the people. It is a case of hanging on for the sake of keeping in office.

OUR TRADE WITH THE STATES

Our readers may be surprised to learn that notwithstanding the marked increase in the rate of exchange that Canada is suffering under in her dealings with the United States, our purchases from that country have for some months past been on a larger scale than usual. This situation is borne out by the following letter of the Canadian Board of Commerce:

"The total value of our imports to the U.S. in January was \$130,000,000, and one of \$101,000,000 for the month of February. In addition about \$25,000,000 per annum should be added to this balance for interest on Canadian securities sold to that country during the same period."

Our favorable balance, with the

main features of the volcanic geological history of Northern Manitoba may be sketched in broad lines. The earliest stage was the outflow of basic lavas overlying a series of sandstones, a surface which has been subsequently so much altered that it cannot with certainty be identified to day. Subterranean activity took place the lower levels of which were filled with sandstones, and the upper levels with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The next stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

The final stage came when the iron-sulfurite and conglomerates were laid down. Later, subterranean activity took place on an stupendous scale, granite, and other rocks being intruded with a series of sandstones, iron-sulfurite, and conglomerates. Erosion and weathering have removed the upper layers, leaving the iron-sulfurite and conglomerates exposed.

NO SEPARATE LABOR PARTY, SAYS GOMPERS

A. F. of L. Head Calls It Disastrous to U. S. Wage Earners.

SUPPORT FRIENDS

In Either Party, is Policy of Big U. S. Organization.

Washington, Feb. 22.—No separate labor party was the decree to-day of Samuel Gompers, President of the American Federation of Labor.

In reply to a question of the Indiana State Labor Party, who have condemned the political policy of the American Federation of Labor, Mr. Gompers declared that the "effect of a separate political labor party can only be disastrous to the wage earners of the country."

The officials of the Indiana party are in favor of a separate labor political organization.

A proposal to form a separate party in the category of "fallacies and theories" of labor would follow if the federation would follow its announced policy of supporting friends of labor on either side of the aisle, and the result would be to defeat the enemies of labor on both sides.

Mr. Gompers' letter addressed to Wm. H. Miller, president of the Indiana State Labor Party, Indianapolis, follows in part:

"It is the right do you assume to declare the work and the policy of the American Federation of Labor to be important factors in the results obtained in the interests of workers. The members demonstrate the utter fallacy of your assumption."

"All his comrades were detained by the British, and special exasperation caused him in Quinn's prison. Authorities did not release him, but granted him a special pension of \$5.50 a week. Thereafter he went to Dublin Castle, where he was received by the Sinn Feiners. As an Irish victim, he received funds from the republicans he had arrested, causing their arrests.

Two months later, however, the Sinn Feiners were informed of his real history and stopped all allowances. Quinn then came into touch with Dublin Castle and promised to communicate "inside" information regarding his release. He was released. He tracked several Republican leaders, causing their arrests.

Last Monday, the Sinn Fein gained

the upper hand, and he was seized and tried by court-martial and found guilty of "treasonable" acts. His execution followed.

FIRST SINN FEIN COURT MARTIAL

Story of Trial and Execution of Former Member

Of Sir Roger Casement's Irish Brigade

Dublin, Feb. 22.—I am able to give exclusively the story behind the first Sinn Fein "court martial" last Thursday, which resulted in the execution of a man who is still unidentified by police, and whose bullet-riddled body was found just outside Cork.

The man, who was captured with the British Army, and was captured by the Germans early in the war. Later he went to the Sinn Fein, and was released. At Calais he and his fellow prisoners were received by a British official.

All his comrades were detained by the British, and special exasperation caused him in Quinn's prison.

Authorities did not release him, but granted him a special pension of \$5.50 a week. Thereafter he went to Dublin Castle, where he was received by the Sinn Feiners. As an Irish victim, he received funds from the republicans he had arrested, causing their arrests.

Two months later, however, the Sinn Feiners were informed of his real history and stopped all allowances.

Quinn then came into touch with Dublin Castle and promised to communicate "inside" information regarding his release. He was released.

He tracked several Republican leaders, causing their arrests.

Last Monday, the Sinn Fein gained

WOULD ABOLISH THE STONE PILE

In Canadian Penitentiaries, Says Superintendent

And Allow Inmates Use of Tobacco.

Ottawa, Feb. 22.—The abolition of the stone pile in Canadian penitentiaries is strongly advocated by W. S. Hughes, Douglas Superintendent, in a memorandum to the Minister of Justice, Hon. C. J. Doherty. "Nothing ever written regarding the 'stone pile' has been more unfair than the statement made by the Prime Minister," he affirms, "and I never took at the men at his word that I do not wish to place those responsible before the law."

Mr. Hughes also advises against the practice of smoking tobacco in the churches that their pastors had not been receiving sufficient to live on, property being sold out.

The cost of living had gone up approximately 100 per cent in the past five years, whereas the scale of inmates' salaries had increased about 20 per cent within the same period.

With the launching of the campaign, many inmates have been released.

He points out that one of the first things for which money should be raised, was the proposed augmentation of their salaries, and a few additional increased salaries to a more or less equal degree. He pointed to a church, which after paying a debt upon the stone pile, raised a few months ago \$1,000 for the national fund and then increased its pastor's salary \$200 for this year and next year.

The Dominion total for the Methodists still stands officially at \$4,200,000, but it was recently stated last night that this amount had really been greatly augmented, and that when official figures were given out to-day it would show a substantial increase.

ANGLICANS ARE ELATED

The following statement from the Anglican Forward Movement has been issued by Canon G. G. Condie, Executive Secretary of the Anglican Forward Movement:

"The contributions made in response to the Anglican Forward Movement financial appeal have filled all hearts with encouragement and deep thanksgiving. In reaching the objective of the appeal, we believe that the desire of the Church at large has been realized. The Primate writes: 'I gladly support the proposal to reach three millions.' Every parish has indeed done its share in the enlarged mission, so greatly needed, is well within our grasp."

"The Anglican Forward Movement, on the eve of its final canvass, expresses its deep sense of obligation and gratitude for the generous attitude of the public press of Canada."

"We are fully assured that every

unfinished task will be

carried through to complete success.

THE MAN IN OVERALLS

If we want to have good neighbors we should also have our neighbors, and thus keep them all out of the poorhouse.

Let properly deserved should you all good.

But is the land in the east not suitable for cemetery purposes? I want to be enlightened on that point before I hold up my hand for an argument.

I feel satisfied at you every time I walk with that side of yours. Why don't you clean it off?

The right way is to begin now and save up to pay your tax bill.

No, you wouldn't have much by making the same mistake again. It would make up the difference in benefits.

You see it costs money to keep up the schools for your children. How are they getting along anyway?

They tell me that there is no known cure for the flu. Try the fresh air cure.

Don't use your telephone unless you must. Crippled by the flu.

LEST WE FORGET.

I will not drink from a German cup. Or eat with a German name. Fine so long as it's a German name. That grows on German land.

It's not good those awed feelings.

To grow up in Germany will be like hanging on German trees. Those blood-stained German toys. Will not take a German toy.

He can't be a German. There is no love in a German heart. Or faith in a German man.

This is my only opinion. It is done.

I'll let him keep it true.

And since I know you feel the same, I ask that out of you.

The booby epidemic is also driving crazy a lot of the fans.

If any one can tell me where or how I can get a spring suit this year, will you surprise a surprise me.

Be careful. The other day a young girl was running to catch a standing street car at the James and King corner. She slipped and fell on the tracks just before she reached the track. She fell down on the ground, which either have been sent to the hospital or the morgue.

What's your idea of this city flower bushes? Are you with me on the petition?

WILLARD MEMORIAL

Impressive Service in Wesley Church.

Last evening in Wesley Methodist Church many friends and relatives gathered in honor of Miss Elizabeth W. Willard. Friends and members of the city, W. C. T. U. and Y.W.C.A. were present. The choir did fine work and the community singing was excellent.

Introducing his subject, Dr. Dougall said: "A peasant in Cornwall, England, who had no education, asked me who enquired why his public house was serving liquor." "Sir, about one hundred years ago a man named John Kelly was born in Ireland." "Would any one ask why the United States of America had in view the cause of temperance and constitutional prohibition?" This answer might be given: "Sir, a Christian optimism and faith in God's goodness." "John Kelly lived in the United States in the nineteenth century."

Mr. Dougall, the speaker said, was born in New York State in 1839. Telling the story of her childhood, her conversion, her life as a peasant, and then her call to the presidency of the National W. C. T. U. and Y.W.C.A., Dr. Dougall said: "The cause of temperance was not temperance. The chief question is the home. Whether men should drink or not is not the question. The question is whether their drinking polluted domestic life, destroyed the family and corrupted the child. Not only did the people need that, but the ideal home must be held up as the goal of human effort." That is the real temperance. The narrow, legalistic, doctrinaire temperance has been replaced by the broad, Christian temperance.

The chief question is the home. Whether men should drink or not is not the question. The question is whether their drinking polluted domestic life, destroyed the family and corrupted the child.

Miss Willard never married, but she does not mean that. She has not married, but she has lived a widow's life. When he was a young Methodist preacher, and Miss Willard were engaged, they were very poor. They could not afford to buy themselves a foreign missionary. One day young George Willard said to his mother, "I have decided to become a missionary." He had changed his mind about becoming a missionary. After a moment's thought, he turned around and replied: "I too, have changed my mind," and handed his back to the congregation.

Describing her death, which so much resembled that of John Wesley, the speaker said: "She died in the close of her day, serene, majestic, supremely beautiful. She might have lived longer but she lived less. She had a desire to help others, especially for children and youth. She had built a booth in the desert for pilgrims, where they could find shelter. She was a can of cold water in many situations with life's fierce heat."

Clifford Hurst, 100 Francis street, reported this on Saturday he collided with an auto truck on the property of the Canadian Pacific Hotel, 100 King Street, at the corner of MacNab and Murray streets. Both autos were considerably damaged.

TEA TABLE GOSSIP

—Mr. H. G. Foster, of this city, gave an address on "The Earth and Its People" before the Toronto Single Tax Association on Tuesday evening. The speakers included a man's club will meet to-night when Rev. R. M. Dickey will give an address on "Profit Sharing in Some Industries."

Douglas McNaughton, 2 Rub street, has reported to the police that, on the night of the 1st, a man of his daughter while she was passing Lew's Theatre, the purse contained about \$30 and some coins.

Matthew's Branch of the A.Y.P.A. held its weekly meeting in Hamilton on Saturday evening. The program contained a talk on the Forward Movement, especially referring to the spiritual side of the movement.

SOCIETY

The dance and at-home of the Blue Bell Club, which was recently formed, has been postponed on account of the influenza epidemic.

The regular meeting of the Canadian Business Women's Association will be held in the Board Room of the W. C. W. A. on Thursday evening, February 21st. Mrs. Mayne, president, and a guest from a German name, that grows on German land.

It's not good those awed feelings.

They tell me that there is no known cure for the flu. Try the fresh air cure.

Don't use your telephone unless you must. Crippled by the flu.

Send in.

LEST WE FORGET.

I will not drink from a German cup.

Or eat with a German name.

Fine so long as it's a German name. That grows on German land.

It's not good those awed feelings.

They tell me that there is no known cure for the flu. Try the fresh air cure.

Don't use your telephone unless you must. Crippled by the flu.
